An essential desk accessory for the fountain pen enthusiast

Knobs

The rocker blotter “handles” I use are standard drawer knobs available at hardware stores everywhere; and at many internet sites. My two favorite knobs come from Home Depot. Two internet sites of note are www.usknobs.com and www.knobsandhardware.com.

If you do not like the pictured knob on the rocker blotter you are ordering you can select any of the knobs below as a replacement. I have added my comments for whatever value they may be. I can cut wood, but choice of colors and handles dips into the artistic/design realm for which I am somewhat “challenged.”

	<p>#1. This big solid brass 1 3/8 round knob with wide base plate is my favorite knob for the standard sized rocker blotters. Polished bright brass. Pictured here with a standard sized rocker blotter.</p>
	<p>#2. My Favorite knob for baby blotters. This 1 5/16 long oval knob has an antique/distressed brass finish.</p>

#3. Round bright brass with narrow base. 1 1/8 diameter. Shown with baby blotter. Nice.

#4. Tall, oval, brushed brass, 1 1/4 long. Shown with baby blotter. A little weird, maybe too "modern" for my taste. (not my first, second or third choice.)

#5. 1 3/8 football shaped antique brass show with standard blotter. I like this one, but I think it is better on the walnut or heritage stained blotters. Bright brass looks better on the natural blotters. See next frame.

#6. 1 3/8 football shaped bright brass with standard blotter. Nice and heavy, good grasp.

#7. 1 3/8 football shaped brushed brass with standard blotter. For my eye, the brushed look combined with the shape of this handle looks too "modern" on what is essentially is that is intended to be reminiscent of yesterday. You decide. It would look better on a dark stained blotter in any case.

#7. Same as above but on baby blotter. Looks acceptable here, maybe even nice.

#8. Flat oval. 1 1/2 long. Dull Brass. Baby Blotter. (I don't really like this one and have no idea why I thought anyone else would like it!)

#9. Round 1 1/8 diameter brushed/dull brass on rocker blotter. This is different than the brushed brass of #7 above. This is very nice and works well on this baby blotter.

#10. 1 ¼ round polished brass. Similar to number 3. Slightly larger. Very nice on this Baby Blotter.

#11. White capped brass. Light weight. 1 3/16 diameter. (Looks and feels cheap, but may match other knobs on your desk or work area.)

#12. Flat brass. 1 3/16 diameter. Light weight. (Looks and feels cheap, but may match other knobs on your desk or work area.)

#13. See my note on brushed brass round knobs on frame #7 above. 1 ¼ diameter.
