## **Use and Care of Your Rocker Blotter**

Common uses of your new rocker blotter:

- Blotting up excess ink.
- Showing off on your desk.
- An object of conversation.

Other Possible uses:

- Paper weight. (tends to fall off of high piles)
- Door stop. (actually works quite well)
- Self-defense weapon. (standard size only)
- Squashing bugs. (adds rich earthy tones to the blotter paper)

Not Recommended for:

- Computer repair

Maintenance:

Next to nothing....

I finish each rocker blotter with 4 coats of polyurethane varnish which is very, very tough. Polyurethane will not react to skin oils so you don't have to worry about that gummy feeling you sometimes get on lacquer finished products.

A damp cloth or any brand of furniture polish will keep your rocker blotter looking new for years. Furniture polish will not hurt the knob. The knob can be cleaned with any brass cleaner but most often a damp cloth will work fine. If you are going to use a brass cleaner on the knob you will want to remove the knob from the rocker blotter.
